* The **UNDOK app** enables remote control of the WFR-28C running on your iPhone, iPod touch or Android smartphone. **UNDOK** is the remote control app for Sangean Internet radios and media streamers for your iPhone, iPod touch or Android smartphone. The app allows selection of Internet radio stations, selection and control of media for UPnP/DLNA music streaming from a local computer, server or NAS device, as well as control of FM radio and other functions (where these functions are present on the radio). The Now Playing screen provides radio station or media information with direct control of the radio volume. Download **UNDOK** from iTunes (Apple App Store) or the Google Play Store now!

* RDS (Radio Data System) is a system by which various information sent by the radio station can be displayed on the screen of an RDS equipped radio. Information can include: Station identification (name – shown in place of the frequency), program information, promotional announcements, weather, time and more. RDS is intended to provide an enhanced experience for the listener. NOTE: RDS is not provided by all radio stations.

[1] Operates with mains power only
